Our History

In 1984, Joe Mansueto left his job as a stock analyst. He realized that investors lacked the information they needed to make intelligent decisions about which investments best fit their plans. At the same time, he saw mutual funds growing in popularity as the tides were shifting away from company pensions to 401(k) plans. What was missing, he thought, was investment research for the average investor.

Joe turned his idea into a new business with high aspirations—to help investors reach their financial goals. Driven by the same entrepreneurial spirit that led him to sell sodas and snacks to his dorm-mates while earning his master’s degree at the University of Chicago, Joe invested a small sum of money into a few early-model computers and launched Morningstar from his one-bedroom apartment in Chicago’s Lincoln Park neighborhood.

Morningstar published its first product, The Mutual Fund Sourcebook®, a quarterly publication containing performance data, portfolio holdings, and other information on approximately 400 mutual funds. This large-scale collection of mutual fund data was priced affordably for individual investors. In the years since the Sourcebook’s first printing, Morningstar has served a key role in the investment community. Today Morningstar is one of the most recognized and trusted names in the investment industry.

Our Values

- Investors First
- Great Products
- Great People
- Uncompromising Ethics
- Entrepreneurial Spirit
- Financial Success

Individual investors use Morningstar to make educated investment decisions. These investors want pertinent facts they can trust from an independent source, delivered in easy-to-understand formats. Financial advisors and other investment professionals turn to Morningstar for tools that help them research, analyze, present, and support their investment ideas. Morningstar’s research, analytics, and investment management services help advisors make more efficient use of their time and deliver better investment outcomes to clients.

Asset management firms of all sizes look to Morningstar for ideas that help them develop, differentiate, and manage financial products—all while strengthening connections with distributors and investors. Tapping into our independent research and industry expertise helps asset managers discover efficiencies and innovations while meeting regulatory challenges and global market needs.

Retirement plan providers differentiate their businesses through Morningstar’s expertise in improving existing plans and pioneering retirement products. They also value Morningstar as a single source for investment consulting, advisory services, software, data, and research. Retirement plan sponsors enhance their benefits programs with Morningstar’s independent investment management services, accessible communications, and knowledge about serving investors. We help plan sponsors meet their fiduciary responsibilities and better prepare employees for retirement.
